

# **Agenda for Fisheries 2030 multi-stakeholder workshop - Thursday 28 May**

Level 4 MFish Head Office building

## **9.15 Mihi and Karakia - Carl Ross**

Cup of tea

## **9.40 Welcome - Wayne McNee**

The CE will introduce and provide context for moving forwards with Fisheries 2030.

## **10.00 First session**

The objective of the first session is to confirm a shared view about the long-term vision for NZ fisheries. The vision encompasses the overall goal (and its components) and the values and principles to be applied as we work towards achieving it.

The session will be a facilitated full-group discussion and will use the revised material developed from the first workshop as a starting point.

## **10.45 Second session**

The objective of the second session is to identify areas of reform or management activity that could be progressed over the next 3 years.

Participants will break into small groups to discuss their views on the priority, scope, and sequence of possible work. This will allow MFish to provide informed advice to Cabinet.

We will use the PWC report as the basis of the small group discussions about an appropriate plan of action.

Reports from the small groups will then be discussed by the full group in the third session.

## **12.00 - 12.30 Lunch**

### **12.30 Continuation of second session**

Continuation of small group discussion.

### **1.00 Third session**

Report back of small group discussions to the full group.

### **1.45 Final session**

Confirmation about process from here.

### **2.00 Closing - Mike Noho**
